

The Accessible Information Standard aims to ensure that patients (or their carers) who have a disability or sensory loss can receive, access and understand information, for example in large print, braille or via email, and professional communication support if they need it, for example from a British Sign Language interpreter.

This applies to patients and their carers who have information and / or communication needs relating to a disability, impairment or sensory loss. It also applies to parents and carers of patients who have such information and / or communication needs, where appropriate.

Individuals most likely to be affected by the Standard include people who are blind or deaf, who have some hearing and / or visual loss, people who are deaf blind and people with a learning disability. However, this list is not exhaustive.

• Do you have communication needs? Yes No

If Yes

• How do you prefer to be contacted?

• What is your preferred method of communication?

• How would you like us to communicate with you?

• Can you explain what support would be helpful?

• What is the best way to send you information?

• What communication support could we provide for you?

.....
