

Patient Participation Group Distribution Report March 2015

Our patient participation group has increased in number since March 2014 from 48 to 69. The distribution changes are as follows:

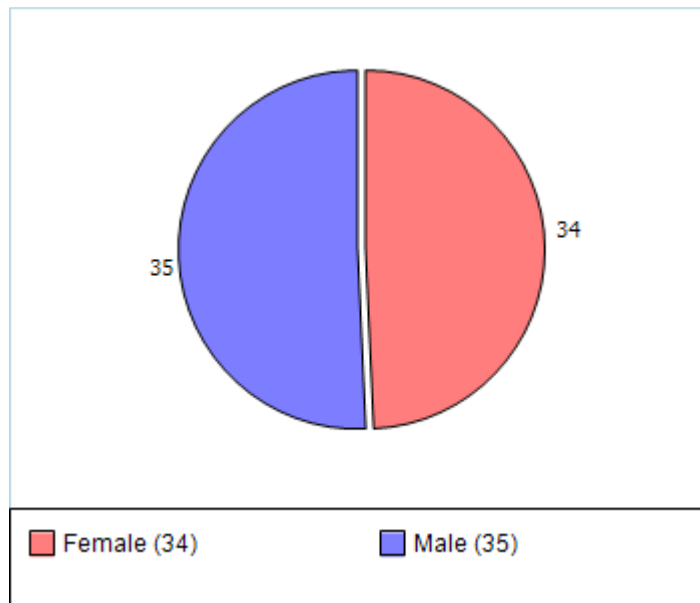

Females have increased from 25 to 34
Males have increased from 23 to 35

A significant addition is the growth of the age group of 55 to 64 which has increased by 7 members. We are also pleased that there has been an increase in the under 16 age group.

We also feel that the ethnicity of our PPG is entirely representative of our practice population.

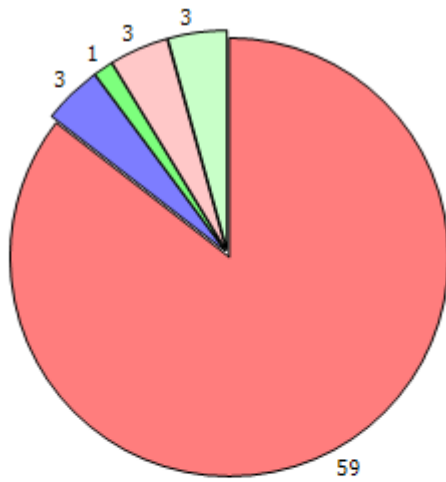

Distribution Details

Gender

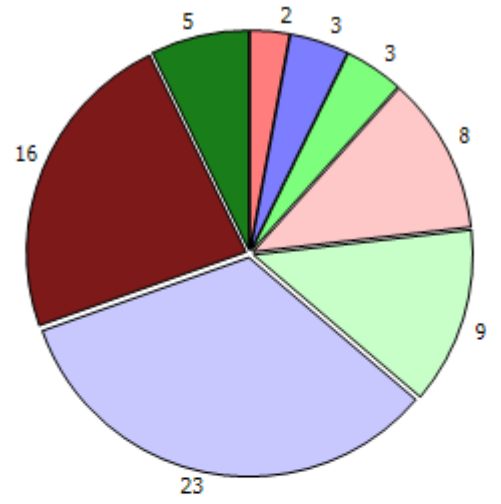

Ethnicity

Age

- White British (59)
- Indian (3)
- Bangladeshi (1)
- Black Caribbean (3)
- Other (3)

- | | |
|---|---|
| Under 16 (2) | 17 - 24 (3) |
| 25 - 34 (3) | 35 - 44 (8) |
| 45 - 54 (9) | 55 - 64 (23) |
